

# Armistice Merchants !!

Plague has ravaged the land and the Kingdoms have retreated, no longer able to continue the war that has raged for years. A temporary truce has been negotiated allowing all factions a chance to regroup and recover. The land is still a dark place. Merchants and the populace go hungry. Many supplies are hard to come by. People have not seen their families or friends for a long time as they hide themselves away from danger.

But there is hope! Apothecaries have finally begun to treat the populace and get the sickness that has hounded us all under control. It is a time of recovery for all sides and peace reigns, but for how long? It is a time of Armistice!

This event will take the place of the SCA's traditional Pennsic war for 2021 which has been regrettably postponed for another year. This will be a form of Period event in the fashion of Pennsic and it is our hope to create it with as much of the feel of that event as possible.

*Merchants, Here's your chance to find new markets and re-invigorate familiar ones !!*
